Hi Robert: No attachment came through. Would you please send again. I apologize that you didn't get a copy of the Keystone Ridge. I will place a copy in the morning this a.m.

Joelle

Joelle,

Attached is the Escrow for the new project with Anderson Engineering. I believe that the next step is for the attached to be transferred to State of Utah letterhead. Would you please move forward with this portion, by making the transfer to letterhead and then mailing the document to me for signature. I will then take it from there.

We have already established the CD that will be utilized for the project and will have all of that information for you upon completion of the documentation.

I still have not received a copy of the completed document for previous project noting Mr Braxton's signature. I would appreciate a copy of that portion of the document as well.

Thank you.
